

RECEIVERS

CPI Beverly Microwave Division manufactures a variety of Receivers from L-band to Ka-band

Performance Advantages

- Frequencies: Available in L, S, C, X, Ku, Ka Bands
- Low Noise Figures
- Digital Gain Control
- Linearized RF Attenuation
- Very High Dynamic Range
- Fast Recovery Time
- Switched IF Filter

Features

- Dual-conversion radar receivers.
- The receivers can be selected to output the first IF, wide-band L-band signal or the second IF signal converted to VHF.
- The receivers are designed to have a very high dynamic range to operate in a multiple-system environment.

The properties listed above should be used for basic information only.
Formal, controlled specifications may be obtained from CPI for use in equipment design.

Certificate Number: 11607
