

## Communications & Power Industries Coaxial Magnetron

The VMC2033B is a coaxial magnetron that delivers high peak and average RF power for use in weather radar transmitters.

The VMC2033B will mount directly into new and existing sockets and can be operated under various pulse and input conditions to accommodate wide ranging operating requirements. In addition to high power, the VMC2033B provides excellent frequency stability, low jitter and long life.

### FEATURES:

- Frequency 5.3 – 5.85 GHz
- Peak power output 325 kW
- Duty cycle .001
- Air cooled
- Mechanically tunable

### BENEFITS:

- 40,000 hours life
- Long life

### APPLICATIONS:

- Weather radars

# CPI C-Band 250 kW Coaxial Magnetron: VMC2033A

## Electrical Specifications

Frequency	5.3 -5.85 GHz
Peak power output	250 kW
Average power output	2.5 kW
Pulse voltage	25 – 26 kV
Peak anode current	32 A
Average anode current	24.0 mA
Pulse width	3.0 $\mu$ S
Duty cycle	0.001
Maximum filament voltage	10.5 V
Maximum filament current	13 A
Minimum warm-up time	300 S
Maximum load VSWR	1.5:1

## Mechanical and Environmental Specifications

Cooling	Forced air
Maximum body temperature	120°C
Mounting position	Any
Support	Mounting flange
Coupling	UG148B/U choke flange modified for clearance holes
Weight	37 lbs. (16.78 kg)

\*Electrical specifications are typical. Other operating conditions are obtainable.

With a history of producing high quality products, we can help your with magnetron.
