

MCL is Alive, Well, and Moving to Lisle, Illinois

PALO ALTO, Calif. – 28 January, 2014 - Communications & Power Industries announced today the relocation of the former-MCL facilities from Bolingbrook, Illinois to Lisle, Illinois. At this new location the company will establish an efficient, full-capability service center providing repairs and technical support for MCL amplifiers. The new Lisle facility, named CPI Satcom Chicago Operations, will also support CPI Satcom Division's design engineering efforts and serve as a manufacturing center, primarily of spare parts.

"CPI is fully committed to supporting MCL products used by customers throughout the world," said Andy Tafler, President of CPI Satcom Division. "Former MCL customers can rest assured that quality product support will continue as it always has. With the primary service center in Illinois and a host of service centers assisting around the world, we look forward to meeting or exceeding customer expectations."

About CPI Satcom – CPI Satcom is a leading supplier of microwave amplifiers and high power BUCs for both commercial and military satcom uplink applications. The company's state-of-the-art design and manufacturing utilizes TWT, klystron and solid state technology. CPI claims the world's largest installed base of satcom uplink amplifiers, with over 40,000 supplied since the early 1970s.
