

COMMUNICATIONS & POWER INDUSTRIES WINS \$2 MILLION CONTRACT FOR 500 W KA-BAND TWTAS

WASHINGTON – March 17, 2015 – The Satcom Division of Communications & Power Industries LLC (CPI) has been awarded a contract in excess of \$2 million from a United States government integrator for high-power, outdoor, millimeter-wave traveling wave tube amplifiers (TWTAs) and related system hardware. CPI's products will be used to support a significant, ground-based, U.S. military satellite communications program. CPI's 500 W Ka-band amplifier was chosen, in part, because of its ability to meet the government's stringent requirements for long life and high reliability.

CPI is the one of the largest manufacturers of a wide range of Ka-band communications amplifiers, consisting of both SSPAs and TWTAs. These amplifiers are used around the world in fixed and mobile gateways for both military and commercial applications. CPI offers amplifiers in other frequencies from S- to V-bands. CPI's satellite communications products are supported by more than 20 service centers around the world. For more information, contact CPI Satcom via the Web at www.cpii.com/satcomsales or call +1 (650) 846-3803.
