Communications & Power Industries Malibu Division Provides Airborne Data Links for Global Hawk

PALO ALTO, Calif. - June 23, 2014 - The Malibu Division of Communications & Power Industries LLC (CPI) has been selected by an international defense technologies company to provide airborne data links for the RQ-4 Global Hawk unmanned aircraft system (UAS). CPI Malibu Division is providing dual-axis Ku-band high-gain airborne data links for the NATO Alliance Ground Surveillance (AGS) version of the Global Hawk.

Intended to operate autonomously, the high-altitude, long-endurance Global Hawk uses a satellite data link to transmit data and images between the UAS and the ground-based mission control, enabling military commanders to gather near real-time intelligence, surveillance and reconnaissance (ISR) information. CPI Malibu Division's advanced data link antennas are an integral part of Global Hawk's ISR systems, supporting situational awareness in a network-centric battle-space.

"CPI Malibu Division's AT-23 dual-axis airborne data link antennas have high-gain capabilities and can operate at extremely low temperatures, which are essential features for the unique challenges associated with the nature and mission of the RQ-4 Global Hawk," said Steve Lonngren, president of CPI Malibu Division. "We are proud to play a role in providing critical intelligence to today's warfighters and to add the RQ-4 Global Hawk to the growing list of UAS systems that CPI Malibu Division supports."

CPI Malibu Division currently provides both single and dual-axis airborne, high-precision auto-tracking ground data terminals and satellite/line-of-sight (LOS) shipboard communications systems operating at Ku-band to support a number of UAS platforms.

About Communications & Power Industries LLC

Communications & Power Industries LLC, headquartered in Palo Alto, California, is a subsidiary of CPI International Holding Corp. and CPI International, Inc. and a leading provider of microwave, radio frequency, power and control solutions for critical defense, communications, medical, scientific and other applications. Communications & Power Industries LLC develops, manufactures and distributes products used to generate, amplify, transmit and receive high-power/high-frequency microwave and radio frequency signals and/or provide power and control for various applications. End-use applications of these systems include the transmission of radar signals for navigation and location; transmission of deception signals for electronic countermeasures; transmission and amplification of voice, data and video signals for broadcasting, Internet and other types of commercial and military communications; providing power and control for medical diagnostic imaging; and generating microwave energy for radiation therapy in the treatment of cancer and for various industrial and scientific applications.

Certain statements included above constitute "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended and Section 21E of the Securities Exchange Act of 1934, as amended. Forward-looking statements provide our current expectations, beliefs or forecasts of future events. These statements are not guarantees of future performance. Forward-looking statements are subject to known and unknown risks and uncertainties, which could cause actual events or results to differ materially from the results projected, expected or implied by these forward-looking statements. These factors include, but are not limited to, competition in our end markets; our significant amount of debt; changes or reductions in the U.S. defense budget; currency fluctuations; goodwill impairment considerations; customer cancellations of sales contracts; U.S. Government contracts; export restrictions and other laws and regulations; international laws; changes in technology; the impact of unexpected costs; the impact of a general slowdown in the global economy; the impact of environmental laws and regulations; inability to obtain raw materials and components; and the impact of unexpected results of, or issues in connection with, dispositions and acquisitions. These and other risks are described in more detail in our periodic filings with the Securities and Exchange Commission. All future written and oral forward-looking statements attributable to us or any person acting on our behalf are expressly qualified in their entirety by the cautionary statements contained or referred to in this section. New risks and uncertainties arise from time to time, and it is impossible for us to predict these events or how they may affect us. We undertake no duty or obligation to (i) publicly revise any forward-looking statement to reflect circumstances or events occurring after the date hereof, (ii) to reflect the occurrence of unanticipated events or changes in our expectations or (iii) to publicly correct or update any forward-looking statement if CPI becomes aware that such statement is not likely to be achieved.
