

## **CPI International Receives \$6.7 Million in Orders From International Customer**

PALO ALTO, Calif., Aug. 3 /PRNewswire-FirstCall/ - Communications & Power Industries, Inc. (CPI), a leading provider of microwave, radio frequency, power and control solutions for critical defense, communications, medical and other applications, has recently received orders totaling \$6.7 million from a new, international customer. CPI is a subsidiary of CPI International, Inc. (Nasdaq: CPII).

The orders were split between CPI's Microwave Power Products division, which received an order for miniature traveling wave tubes (TWTs) for an airborne electronic countermeasures pod, and its Beverly Microwave Devices division, which received an order for two models of solid-state receiver protectors for a military radar system. "These orders are strategically significant for CPI," says Bob Fickett, president and chief operating officer of CPI. "They represent the first orders for CPI from an important, new, international customer and further strengthen our position in miniature TWT and solid-state control components."

CPI expects to make the first product shipments in conjunction with these orders in the first quarter of fiscal 2007. CPI will make product shipments and recognize revenue from the orders over a three-year period.

About CPI International, Inc.

CPI International, Inc., headquartered in Palo Alto, California, is the parent company of Communications & Power Industries, Inc., a leading provider of microwave, radio frequency, power and control solutions for critical defense, communications, medical, scientific and other applications. Communications & Power Industries, Inc. develops, manufactures and distributes products used to generate, amplify and transmit high-power/high-frequency microwave and radio frequency signals and/or provide power and control for various applications. End-use applications of these systems include the transmission of radar signals for navigation and location; transmission of deception signals for electronic countermeasures; transmission and amplification of voice, data and video signals for broadcasting, Internet and other types of communications; providing power and control for medical diagnostic imaging; and generating microwave energy for radiation therapy in the treatment of cancer and for various industrial and scientific applications.
