Key features For Air Traffic Control
- BIT and controls via EIA-422 remote connection
- Built-in VSWR protection
- Compliant to NTIA regulatory requirements
- Provide high gain, excellent pulse fidelity
- Excellent pulse fidelity with low AM/PM, phase-noise and spectral regrowth performance
- Easy to maintain

Magnetrons
- L, S, X, Ku and Ka Bands
- Excellent frequency stability
- Mechanically tunable frequency
- Air cooled
- Peak power up to 1 MW

Klystrons
- S-Band
- Excellent frequency stability
- Mechanically tunable frequency
- Air cooled
- Peak power up to 1 MW
- C-Band
- Excellent frequency stability
- Fixed tuned to 50 MHz IB
- Air cooled
- Peak power up to 250 kW

Communications & Power Industries
ATC Radar Products

S-Band GaN
High Power Transmitters
- Transmitter cabinet with 12 kW minimum peak output power
- Soft fail by virtue of power combining
- Full redundancy
- >160 dB of power attenuation available
- Designed for ATC shelter applications

S-Band GaN
High Power SSPAs
- 1.3 kW pulsed modules that can be power combined for higher peak power output
- Internal processor with BITE monitoring
- Self protecting

X-Band SSPA’s for airborne radar systems

X-Band GaN
High Power SSPAs
- Frequency range: 9.0 to 10.0 GHz
- BIT and controls via EIA-422 remote
- 1 kW and 1.8 kW pulsed modules at 10% duty
- Up to 12 kW when power combined

Check out all our ATC radar products at www.cpii.com
Communications & Power Industries is a major worldwide supplier of components for many ground based radar systems.

ATC is a service provided by ground-based controllers who direct aircraft on the ground and through controlled airspace. The primary purpose of the ATC systems is to prevent aircraft collisions and to organize and expedite the flow of airplane traffic in both commercial and military markets.

CPI is a major worldwide supplier of components for many ground based radar systems such as: Air Surveillance Radar, Air Route Surveillance Radar, Terminal Doppler Weather Radar (TDWR), Surface Movement Radar and Precision Approach Control and Landing Systems.

At CPI, we provide high quality microwave products supporting air traffic control radar with either klystron or magnetron based technology.
