Weather Radar Products

RECEIVER PROTECTORS & LIMITERS
- S-Band
- C-Band
- X-Band

KLYSTRONS
- 750 kW -1 MW S-Band
- 200 kW - 1 MW C-Band

MAGNETRONS
- 1 MW S-Band
- 250-500 kW C-Band
- 250 kW X-Band

KLYSTRON TRANSMITTERS
- 1 MW S-Band
- 1 MW C-Band
- 250 kW C-Band

MAGNETRON TRANSMITTERS
- 1 MW C-Band
- 350 kW C-Band
- 350 kW Outdoor Unit (C-Band)
- 350 kW Outdoor Unit (X-Band)

Weather Radar Products

Klystrons
- S-band
- Excellent frequency stability
- Mechanically tunable frequency
- Air cooled
- Peak power up to 1 MW
- C-Band
- Excellent frequency stability
- Fixed tuned to 50 MHz IB
- Air cooled
- Peak power up to 250 kW

Magnetrons
- S, C, and X-band magnetrons
- Excellent frequency stability
- Mechanically tunable frequency
- Air cooled anode
- Peak power up to 1 MW
- C-Band
- Excellent frequency stability
- Fixed tuned to 50 MHz IB
- Air cooled
- Peak power up to 250 kW

Receiver Protectors and Limiters
- S, C, and X-Bands
- High peak power
- Low output leakage
- Superior broadband isolation
- Fast recovery time
- Low noise figures

Radar is critical for today’s weather forecasting especially for storms near heavily populated areas. These radars assist meteorologists by detecting changes in local weather patterns. They also offer awareness of oncoming weather patterns at a great distance that might affect the local area.

CPI is the world’s largest producer of coaxial magnetrons, klystrons and receiver protectors. With our experience and product breadth, we can support most new and existing weather radar systems.

We are unique when compared to other suppliers as we can deliver individual microwave components or a complete transmitter. Each transmitter provides a wide range of output power options along with custom user interfaces and remote networking capability.

All CPI components and transmitters are rigorously tested to ensure a long and reliable life that minimizes down time and maximizes customer satisfaction.

At Communications & Power Industries, we provide high quality microwave products supporting weather radar with either klystron or magnetron based technology.

Klystron Weather Radar Transmitters

• S, C, and X-Band transmitters
• Excellent stability & performance
• Tunable
• Up to 1 MW peak output power
• Forced air cooled
• Touch screen with local/remote control
• Ethernet connectivity for remote monitoring & control

Magnetron Weather Radar Transmitters

• S, C, and X-Band transmitters
• Sheltered or outdoor models
• Forced air cooled
• Touch screen with local/remote control
• Ethernet connectivity for remote monitoring & control
• Excellent Doppler performance
• Mechanically tunable frequency
