

CPI's **JETSAT** Services for Klystrons

"Our Commitment to Communication Klystron Customers"

Get it fast with the JETSAT "Rapid Availability" service.

Klystron models with a check mark (✓) in the Rapid Availability Service column on the back of this page will be tuned to your requirements and shipped out within 3 business days of order receipt (subject to CPI terms and conditions of sale).

CPI's klystron "Bonded Storage" service is now part of JETSAT too.

When you purchase a new klystron and sign up for our Bonded Storage service, it is stored and regularly maintained at CPI. We keep it in 'brand new' condition and ready for shipment within 2 business days of your request.

The warranty clock starts the day you receive your klystron – not the day you purchase it. The maximum delay on the start up of your warranty while in Bonded Storage is two years. However, the Bonded Storage service itself is available beyond two years.

Can I get a JETSAT "Extended Warranty" for my klystron?

CPI's industry leading communication klystron warranty can be extended at the time of purchase. Extensions of 12, 18 or 24 months can be added to the original warranty up to a combined maximum warranty period of 36 months. Please call for pricing.

JETSAT services cover all CPI Canada S-band, C-band, X-band, Ku-band and Ka-band klystrons used in Satellite or Tropo communication applications.

JETSAT services can be accessed in North America by calling 1-800-267-JETSAT (5387). To access JETSAT services outside of North America please contact your local CPI sales office.

What's the JETSAT "Environmental Return" service?

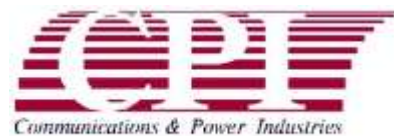

We are committed to the environmentally friendly disposition of used and old CPI Canada klystrons. Call today to see if you are eligible for a credit on the purchase of new replacement klystron (4). We also accept return of equivalent type Thales (formerly Thomson-CSF) klystrons.

- 1) CPI communication klystrons come with a broad range of tuner options, most of which are available under the JESTAT program. If your Klystron model is not shown on the list, please contact CPI to see if it is covered by any of the JETSAT services.
- 2) Frequencies listed are channel centers and may represent a range of frequencies covered by a specific klystron series.
- 3) Power levels listed are measured at the flange and may represent a range of power levels covered by a specific klystron series.
- 4) Environmental return: A credit is applied to same model replacement purchases made within 1 yr of returning an end-of-life klystron carcass.
