

# Available now from CPI: **700 Watts, 24.75 to 25.25 GHz**

## ***BSS Reverse Band ELK***

### **RF and Electrical**

|              |                    |
|--------------|--------------------|
| Frequency    | 24.75 to 25.25 GHz |
| Bandwidth    | 500 MHz            |
| Output Power | 700 W              |
| Gain         | 45 dB              |
| Beam Voltage | 7.5 kV             |
| Beam Current | 500 mA             |

### **Benefits:**

- Designed specifically for BSS Reverse band uplinks
- Compact, rugged design
- Field-proven MTBF: 100,000 hrs
- Delivers unparalleled performance and reliability
- Backed by CPI's industry-leading global customer support network
- CPI technology powers today's most advanced fixed and mobile digital RF links from 1.7 to 220 GHz
  - Solid State RF Modules
  - Classic and MSDC Klystrons
  - Extended Interaction Klystrons
